Introduction

jkr

**“Package a product
that solves a
problem or fulfils
a need for the
characters in it.”**

This project, I have been working on a brief set by design agency JKR, to solve a problem for a character in a movie by packaging a product that would naturally fit into its world.

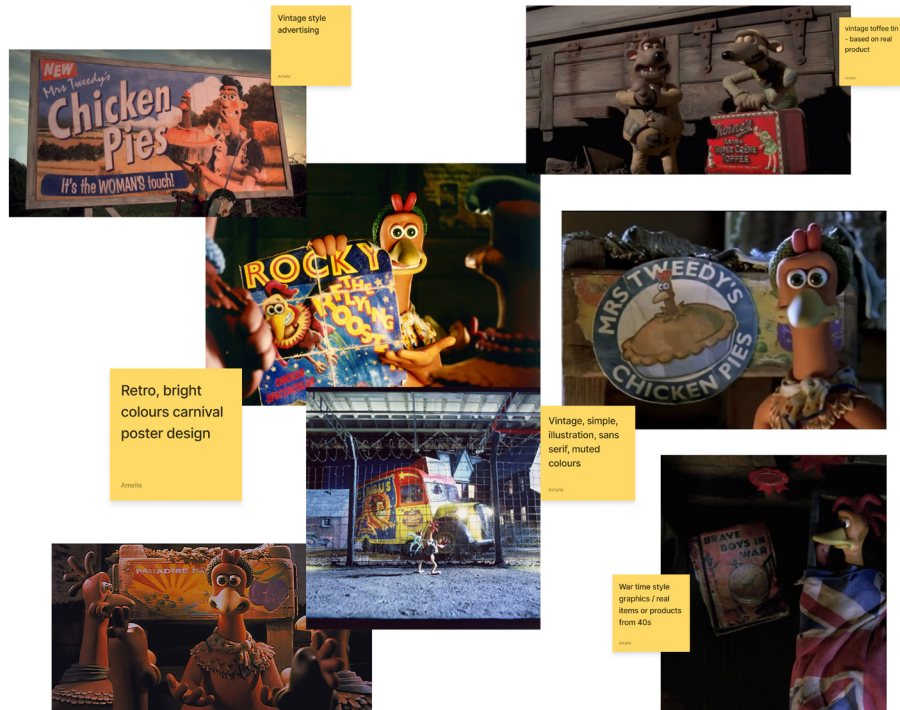

I chose to work on the film ‘Chicken Run’. This movie is set on a farm in Yorkshire during the 1950s, and follows the story of a group of chickens trying to escape before they get turned into chicken pies.

I’ve explored ideas that would fit with the humour, tone and playful nature of the film, while also considering the serious 1950s post-war setting in which the story takes place.

Why chicken run?

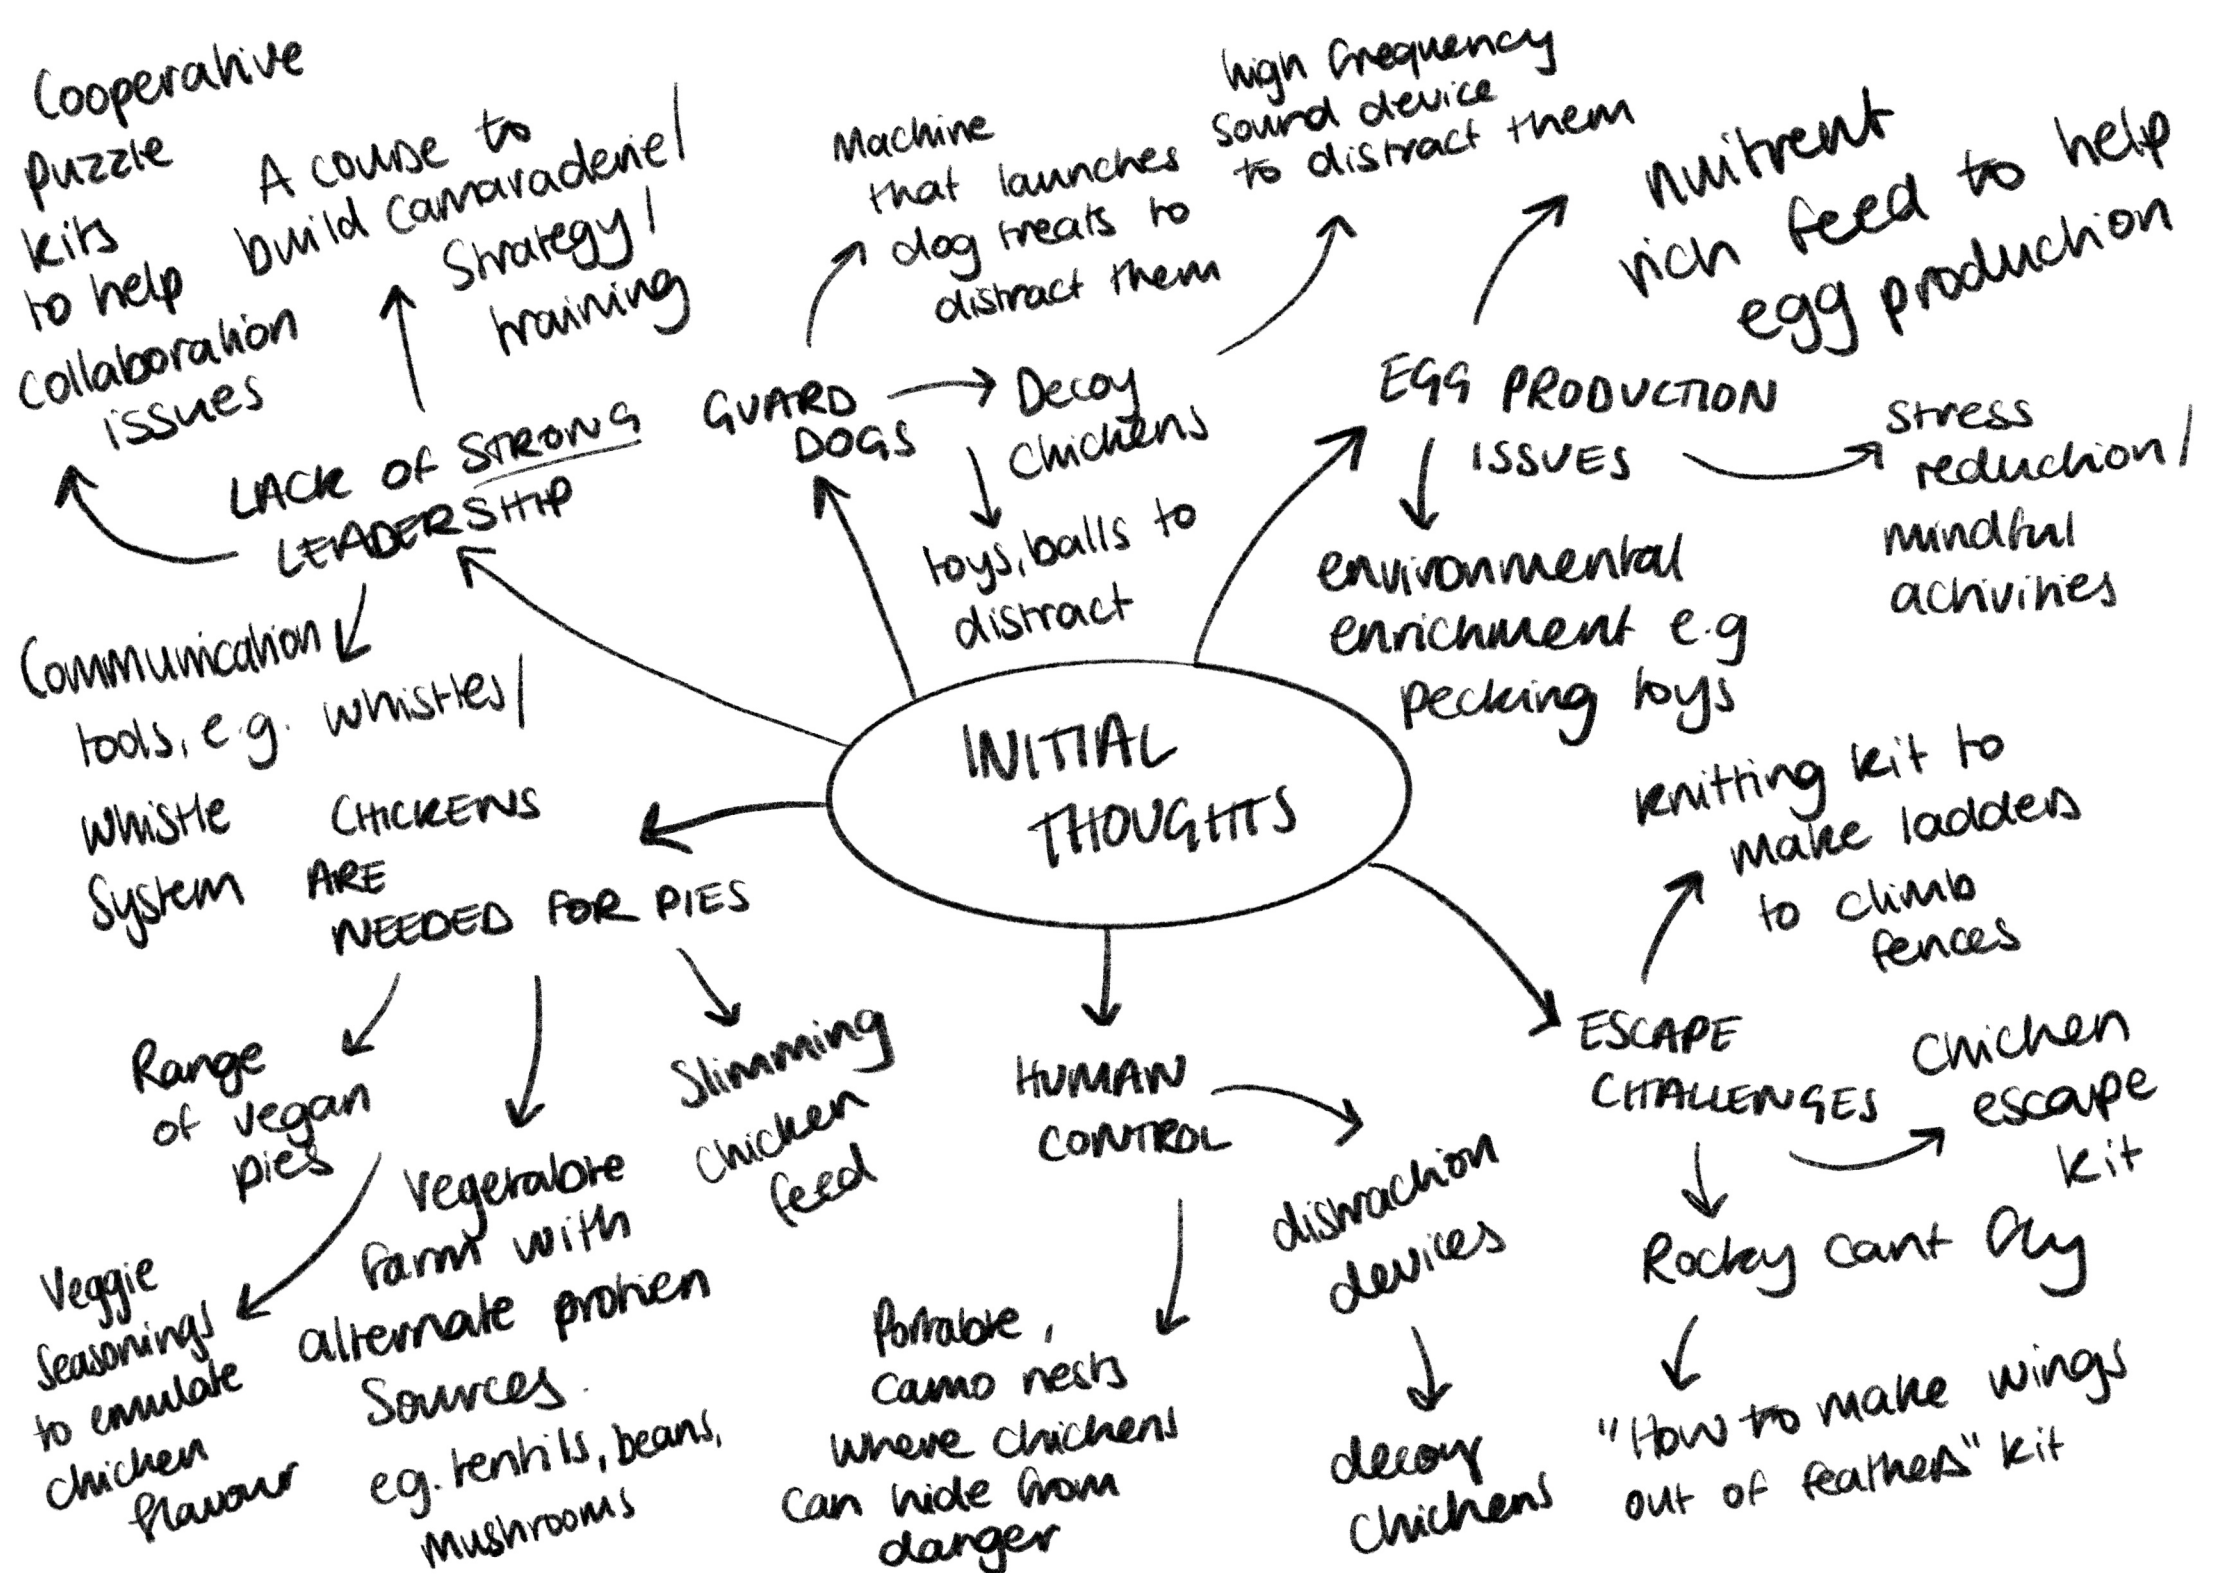

When hearing this brief, my immediate thought was to choose Chicken Run as my film. This is because it is set in a different decade, is animated and has lots of characters that need different problems solving.

I re-watched the movie, started to gather initial thoughts and noted products and their aesthetic that were featured in the film.

Looking at products and advertising in the film.
Image on the right: Movie poster sourced from IMDB.

Product design in the 1950s

I had a look at 'Package Design' by Milner Grey, for some visual inspiration, as this was published in 1955, the time period in which 'Chicken Run' takes place.

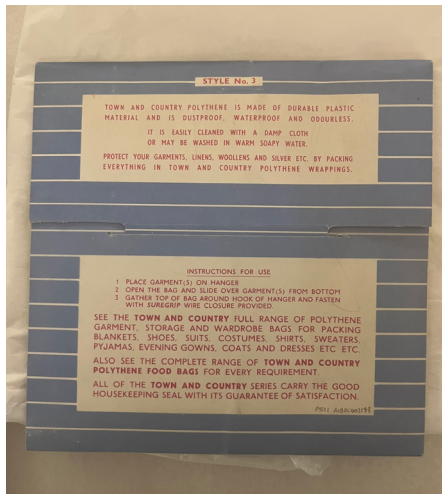

Products featured in 'Package Design' by Milner Grey.

Primary research

I visited the Museum of Design in Plastics (MoDiP) and viewed a range of packaging from the 1940s-1950s to gather some visual inspiration before I went into designing.

As I was looking at different users from the film at this stage, I viewed a range of packaging that would appeal to the different characters.

COM-B WORKSHEET

CAPABILITY

Physically capable - used to running a farm

Good motor skills

No restraining physical abilities - she literally flew through the air at one point in the film

Are they physically capable? Do they have the strength? Do they have the stamina? Can they maintain it? How long?

PSYCHOLOGICAL CAPABILITY

Knowledge or psychological skills, strength, stamina to engage in the necessary mental processes.

SOCIAL OPPORTUNITY

Opportunity for interpersonal influence, social cues, cultural norms that influence the way that we think about things.

PHYSICAL OPPORTUNITY

Opportunity afforded by the physical environment

Can improve her business or chickens egg yield

Plenty of time to engage with a new business - as her previous ones have failed

WH2 could have influenced her - she may have become more cold, serious...

Having to run a farm would influence her behaviour - she has to be stern, on time, organised and make hard decisions

REFLECTIVE MOTIVATION

Reflective processes involving plans (self-conscious intentions) and evaluations (beliefs about what is good/bad)

MOTIVATION

Money/success gives her pleasure/joy

Her chickens inhibit her

Anger seems to be an uncontrollable emotion

SUCCESS IS HER WISH

She perceives her chickens as bad and that they're plotting.

Probably not the most critically aware of her feelings - every emotion comes out as anger

What do Are they criticizing?

ABILITY

Mrs. Tweedy sees herself as strong, determined, and superior to others.

She believes she's smarter than those around her, including her husband and the chickens. She tends to dismiss others' ideas

Her self-image is undermined by her inability to execute her grand plans successfully

High problem-solving ability when it comes to planning her pie machine and strategizing ways to maximize profits.

Low adaptability, as she becomes easily frustrated when her plans don't go as expected.

Her communication is domineering and dismissive.

Headband works with her - unknown about any other friends or family

Owning a business is normal to them - she has ran a farm, an egg business and a chicken pie company

Would have survived/feared through WH2. May crave high quality living after years of rations and fear.

They wouldn't want a mentor - too headstrong

Living on a farm in Yorkshire in the 50s - killing chickens is normal to them

The chickens

They have limited physical abilities. They can't fly, have a lack of strength and they don't lay enough eggs.

They need to escape the farm before being used as chicken pie filling! Their attempts are unsuccessful.

"I don't want to be a pie. I don't like gravy"

**"The chances of
us gettin' out of
here are a million
to one."**

They are creative and resourceful, have strong teamwork and loyalty to each other and are determined and persistent to escape.

Main personality traits include being quirky, whimsical, 'dumb' and loyal.

"All of me life flashed before me eyes! It was really boring."

Ginger specifically is targeted by Mrs Tweedy, at turn putting Rocky in danger as he tries to help her.

They need tools to help escape. Crafty, fun product to fit in with their playful personalities.

"It's like an oven in here."

**"Ladies, please.
Let's not lose our
heads."**

Constant surveillance and interference from Mrs. Tweedy and guard dogs, along with a pressure to succeed as 'leaders'.

Ginger: Highly intelligent, strategic thinker and resilient leader.
Rocky: Charismatic, physically capable, and skilled at improvisation.
Both: Courageous, resourceful, and able to motivate the flock under pressure.

“FREEEEEEEEEEEEEDOM!”

Focused on ensuring her farm generates significant income. Financial stability is a top priority. Already has a failed egg company.

Wants to improve her public image. She values tradition and coming across as a serious business woman.

**“He’s valuable
you say?”**

"Makes the public feel more comfortable."

Owens an expensive pie machine but can't use it due to runaway chickens.

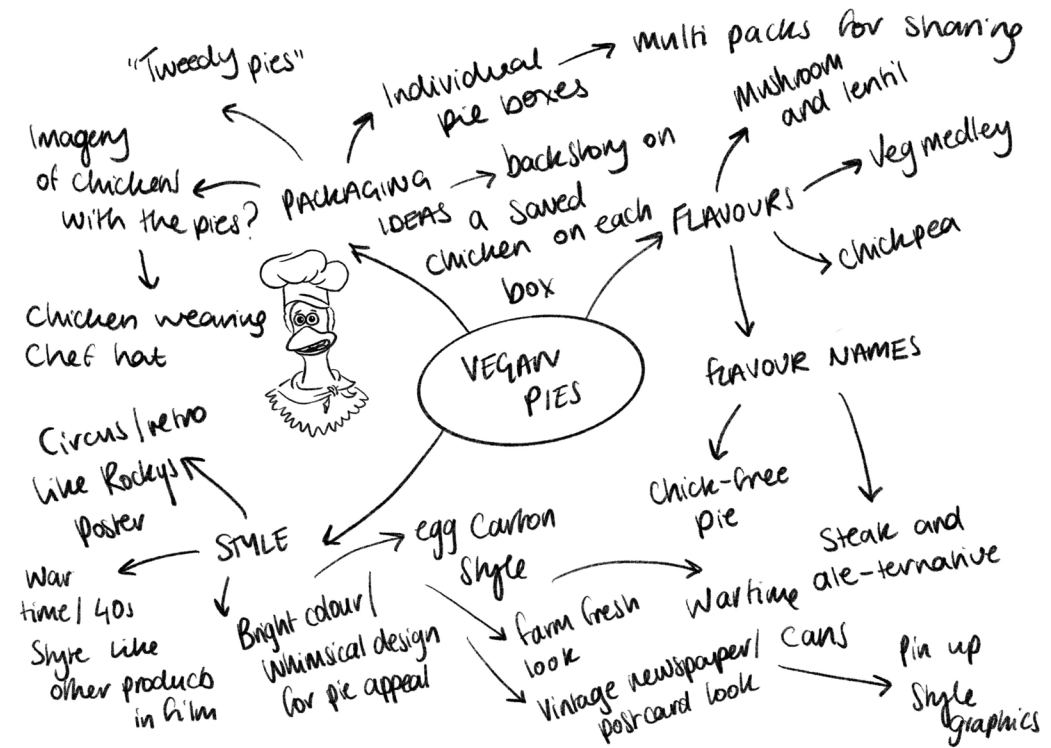

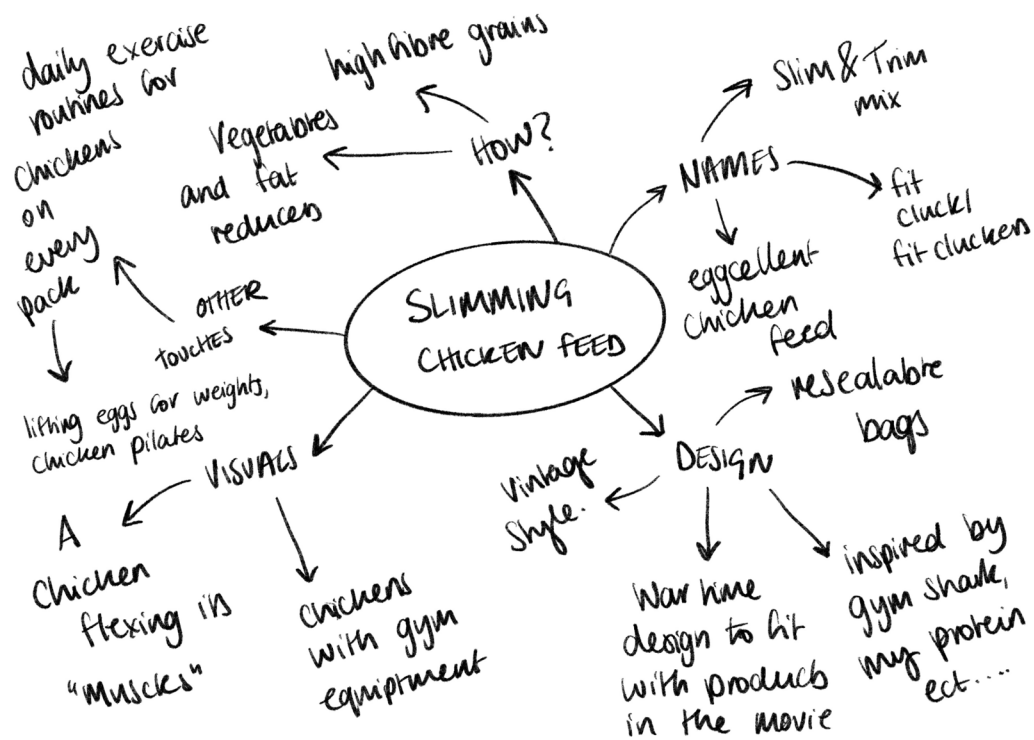

Main personality traits include being stubborn, frigid, ambitious and determined.

“Chicken pies you great lummoX!”

Developing ideas

I used mind maps to develop the ideas I had in my initial brain dump.

After these I made mood boards and spent time sketching packaging ideas for each concept.

MoDiP toy packaging I've taken as inspiration.

Concept two: Vegan pies

User: Mrs Tweedy

Purpose: To replace Mrs Tweedy's current, unsuccessful chicken pie business. This generates revenue for Mrs Tweedy and saves the chickens.

Inspiration: Vintage tin designs

Why: Mrs. Tweedy's traditional, serious nature aligns with a 'high-value' design style, reflecting her business ambitions and matching the film's aesthetic.

Packaging concept I presented during the interim presentation.

Mood board of vintage tin designs. Both authentic and modern versions.

MoDiP 'luxury' packaging I've taken as inspiration.

Initial concept for the vegan pies – inspired by healthy food packaging.

Packaging concept I presented during the interim presentation.

Concept three: Egg-boosting feed

User: All chickens and Mrs Tweedy

Purpose: Mrs Tweedy's pie business is a direct result of the chickens not producing eggs.

Inspiration: Traditional farm yard products

Why: Although the chickens are using the product, Mrs Tweedy would be purchasing it. She would be attracted to the authenticity of the design and its 'straight-forward' attitude.

MoDiP 1950's packaging I've taken as inspiration.

Mood board of 'farm yard' aesthetic

Initial concept for the chicken feed -inspired by animal feed packaging.

Packaging concept I presented during the interim presentation.

Interim presentation

During my interim I presented my three concepts, along with insights and reasoning.

My feedback included:

- Think more into copy write
- Continue with the vegan pies concept

Overall my feedback was really positive, and gave me the next steps to move forward.

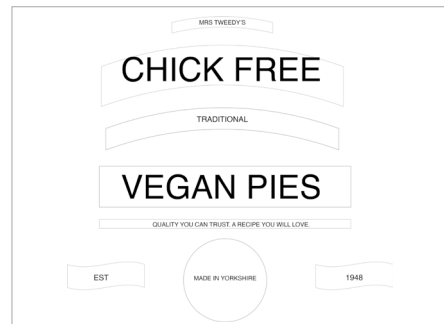

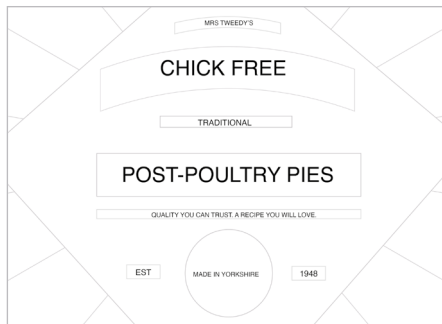

Some slides from my interim presentation.

Developing the composition

To work on composition ideas I created a series of arches, circles and flags to arrange and see what works.

In most of my inspiration pictures, the type is curved, so I've made sure to carry that through my designs.

Dalton Maag type workshop

During a workshop hosted by Eleni Beveratou we looked at legibility and the impact of type, focusing on how different styles can create distinct messages and evoke specific feelings.

This helped me when choosing type that would appeal to my target user this project.

Creating type inspired by a mood board.

Typeface

I've focused on selecting typefaces that balance charm while maintaining a sense of authenticity and timelessness for Mrs. Tweedy's branding.

After the type workshop, I experimented with adding art deco style swashes to fonts in Adobe Illustrator.

Adding swashes to type on paper then tracing on Adobe illustrator.

Here I've shown some of the type faces I considered using. I ended up using Royal signage as a heading font and Old Erika as a body font instead of continuing with a self-made type. I also created a colour palette.

ARCANE NINE

Making the packaging

Using my composition layouts, colour and type I created packaging options. The JKR pin-up session helped decide on what concept to continue with.

Developing the pie packaging.

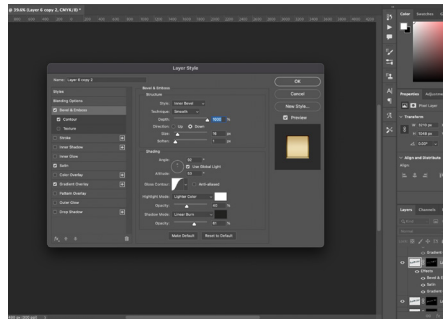

After deciding on my packaging design, I began to add more detail to my product name title.

Getting that 'tin' effect

After developing my packaging design, I experimented with features on Photoshop to get that embossed 'tin' effect.

The final packaging layout.

Experimenting with bevel & emboss.

My title with a new 'tin effect'

Mock-up Development

To create my physical prototype, I made several nets and experimented with size until I was happy. I was then able to print onto high quality card and make my final piece.

For my digital mock-ups, I sourced downloads of tins online.

First net attempt – the lid was too big

Final paper prototype

Final card prototype

Digital mock-ups from yellowimages.com

Touch points

For touch points, I first made 50s style adverts for the product. I felt as if it was too 'American' inspired though - and it didn't fit in with the 'high-quality' vibe I wanted for my product, so I did not include it for my final visuals.

Instead I worked on making a fridge that would display my products, a food cart and the other products in the 'Mrs Tweedy's pies' line.

My 'Beef and ale-ternative' product.

My 'Hogwash Pork' product.

Pie images sourced from Adobe Images.

Fridge sourced from FreePik.

POS stand and food cart initial designs.

Prototype of the food cart.

Thinking 'in-situ'

Initially, I placed my product in a modern supermarket for in-situ mock ups, but realised it clashed with the film's era and just looked wrong! To align with the setting, I explored produce shops as a more fitting context for the products

The imagery on the right shows produce shops that could fit the era of the film.

My Post-Poultry packaging in Waitrose.

Final presentation

During the award ceremony, My design was short-listed for:

- Typography
- Insights
- Craft

I also **won** the craft award for my packaging and the ability for it to be a real product!

For the final piece, I brought in my packaging design, along with an example of the material it would be made of in the film.

What I presented at the JKR showcase.

Initial photo shoot of the product.

Some feedback I received in the critique included:

- Try to find a more suitable fridge/area to mock up my product into - one that is not surrounded by vegetables
- Include the other pie products I have created in the fridge

I worked on this feedback by exploring new farm shops for my 'in-situ' visuals and by updating my fridge visual.

I updated my final presentation with these changes.

Reflection

Overall, I'm happy with how my work for this project turned out. I was awarded for Craft and shortlisted for both the Insights and Typography awards, which was a huge confidence booster.

I found the interim presentation really helpful, as it gave me an opportunity to gather feedback at a crucial stage. The chance to receive critique from Megan, from JKR agency, was especially valuable. For this brief, I found prototyping my ideas and creating a final physical outcome beneficial in understanding how the designs could function in both the film and in real-life.

If I had more time to work on this project, I would have loved to create my digital mockups in a software such as blender, rather than using digital downloads. However, I did spend extra time making the mockups look realistic through techniques like embossing to apply a tin effect, which helped enhance the visuals.
